Madhu Biogreen Products Pvt Ltd is a start-up company, formed with the vision to bridge the demand supply gap of fruits and vegetables in the states of Telangana and Andhra Pradesh by adopting eco-friendly farming practices. The company also intended for organic waste management for the production of bio-gas and other organic inputs.

Well designed packing house facilities that conform to the principles of Good Manufacturing Practice (GMP) and which are equipped with an appropriate level and scale of post-harvest technology are, therefore, a critical and important component of the infrastructural base to support value adding and quality and safety management in fresh produce supply chains. Mr. Madhusudan a young entrepreneur approached ICRISAT proposing this Modern Packhouse unit at Peddashapur Village.
