Email	gtech-expo@hotmail.co

Hytech Seed India Private Limited is a research-based and market-driven seed company founded and incorporated in 2004 by seedsman Dr. Suri Sehgal, a principal elder among a distinguished lineage of experts in world agriculture. The company develops, produces, and sells high-quality, high-yielding hybrids of corn, sorghum, pearl millet, sunflower, and sorghum sudan grass. By assuring the best-performing products, Hytech Seed India is emerging as a recognized competitor alongside the best seed companies in India, especially in the premium hybrid seed segments of the country. Hytech Seed India is in the product performance business—developing high-yielding products to boost farmers' economy. Being responsive to farmers and making a positive difference in the hybrid seed industry, Hytech Seed India brings best hybrids to the market.

G-Tech approached ABI ICRISAT to access to Cold Storage facilities & sorghum and pearl millet varieties.
